University of Louisville

TABLE OF CONTENTS

	<u>Page</u>
INTRODUCTION.....	2
I. MODELS IN TRANSPORTATION	
A. Traffic Models (General).....	3
B. Trip Assignment Models.....	5
C. Urban.....	21
D. Transportation Flow Models.....	40
II. TRANSPORTATION NETWORK	
A. Network Generation Models.....	46
B. Comparing and Evaluating Different Network Structures.....	58
III. SOCIO-ECONOMIC EFFECTS OF TRANSPORTATION	
A. Transportation and Regional Development.....	63
B. Transportation and Environment.....	72
IV. EFFECTS OF TRANSPORTATION ON URBANIZATION.....	76
V. TRANSPORTATION PLANNING	
A. General Studies.....	82
B. Systems Analysis and Transportation Planning.....	87
C. Cost Benefit and Cost Effectiveness.....	90
D. Goals and Criteria.....	92
E. Information Systems.....	93
F. Community Participation in Plan Development and Evaluation.....	94
G. Pricing as a Transportation Planning Tool.....	95
H. Technological Alternatives for Transportation Systems.....	97
VI. OTHER BIBLIOGRAPHIES.....	98

INTRODUCTION

This bibliography was prepared while research was being conducted by the author on the book which will bear the same name.

The literature on transportation systems analysis is widely scattered in numerous publications under a multiplicity of headings and disciplines. Therefore, it is felt that this bibliography can be used as a helpful reference source for future research in the area and/or, equally as well, can be used in the classroom.

The bibliography is arranged topically. Within each chapter and its respective sections the items are listed in alphabetical order by author. In the compilation of this bibliography, the author is greatly indebted to many individuals but above all to the staff of the Transportation Center Library at Northwestern University and the staff of the U.S. Library of Congress for their kind assistance.

D.E.B.

I. MODELS IN TRANSPORTATIONA. Traffic Models (General)
